

END-TO-END ENERGY AND SUSTAINABILITY SOLUTIONS

ABOUT US

Environ is a full-service, national energy consulting firm, empowering commercial, industrial, and non-profit entities to become more sustainable by improving building energy efficiency, facilitating clean energy procurement, increasing resilience, complying with regulations, and meeting ESG commitments.

We understand the ever-changing challenges organizations face and the importance of prudent cost management to curb steeply rising operational costs. By deploying customized energy strategies, we help balance energy intensity and the corresponding utility spend required to run your organization with the need to maintain exceptional environmental quality.

EXPERTISE ACROSS INDUSTRIES

Environ is recognized for innovative energy management and sustainability solutions for 30 years, serving thousands of companies, institutions, healthcare networks, and government agencies. Manufacturers, hospitals, universities, and others benefit from our solutions listed here.

OUR SERVICES

We consider all aspects of your organization's current and future energy usage to help you effectively set, meet, and even exceed your efficiency and sustainability goals.

SUSTAINABILITY

- GHG Inventories
- GHG Inventory Management Plan
- Program Development
- Training

PROCUREMENT

- Electricity
- Natural Gas
- Fuel Oil
- Renewable Energy Credits (RECs)
- Carbon Offsets

EFFICIENCY

- Energy Audits
- Energy Project Development
- Energy Project Management
- Incentive & Grant Management

REPORTING

- Energy Budgeting
- Portfolio Energy Performance Reports
- Energy Award Application Support
- Report Writing (i.e. Climate Action Plan)
- Energy Analytics (i.e. interval data assessment)

RESILIENCY

- On-site energy Analysis
- Microgrid Analysis
- On-site Energy PPA
- Off-site Energy PPA
- Demand Response Program Optimization

COMPLIANCE

- Building Performance Standards
- Carbon Legislation (Local Law 97, BERDO, etc)
- ESG Disclosure (TCFD, CSRD, etc)

STEPS TO DECARBONIZATION

- 01 Establish an Energy Management Team
- 02 Regulatory/Risk Assessment
- 03 Data Collection and Analysis
- 04 Benchmarking and Goal Setting/Review
- 05 Facility Assessments
- 06 Energy and Carbon Reduction Measure Development
- 07 Energy and Carbon Project Prioritization
- 08 Implementation & Measurement and Verification

FINANCING ENERGY EFFICIENCY, RESILIENCY AND SUSTAINABILITY

Our tools include Power Purchase Agreements (PPAs), energy as a service (EaaS), and other low- and no-capital options, in which you can address your highest-priority energy needs while always receiving savings. Let us show you how.
