

Sustainability Assurance & Verification

Strengthen Your Reporting with Independent Validation

Discover What Environ Can Do For You.

[Book a Meeting](#)

For 15 years, ISOS Group, a division of Environ, has put their stamp on ESG and sustainability reports for accuracy, credibility, transparency, and accountability. ISOS has become the industry standard for 3rd party, validated reports investors and stakeholders can trust. Our services bring you recognition for meeting rigorous standards elevating your performance scores for globally recognized benchmarks.

Our 4-Step Process

- 1 Risk Assessment**
Evaluate underlying management systems and internal controls to assess reporting risks. Ensure reporting boundaries reflect operations to maintain data integrity and regulatory alignment.
- 2 Data Verification**
Verify data accuracy through a structured review process for consistency with standards, such as the greenhouse gas (GHG) Protocol for emissions.
- 3 Compliance Review**
Align disclosures with globally recognized frameworks, including the Corporate Sustainability Reporting Directive (CSRD), Global Reporting Initiative (GRI) and International Financial Reporting Standards (IFRS), leveraging standards like AccountAbility and the International Standard on Sustainability Assurance (ISSA) 5000.
- 4 Final Certification**
Obtain an official assurance statement to demonstrate regulatory compliance, enhance investor confidence, and show transparency in public sustainability reporting.

Key Solution Benefits

-  **Enhanced Credibility and Trust:** Improve stakeholder confidence by reinforcing transparency and accountability in sustainability disclosures through 3rd-party verification.
-  **Regulatory and Standards Compliance:** Stay ahead of evolving regs and standards including: The Sustainability Accountability Standards Board (SASB), Task Force on Climate-Related Financial Disclosures (TCFD), International Sustainability Disclosure Standards (ISSB), the U.S. SEC climate disclosure rule, and California's climate-related disclosure acts.
-  **Competitive Advantage:** Strengthen your ability to attract investors, customers, and business partners focused on sustainability. Our services include awards and recognition submissions.
-  **Operational Efficiency:** Structure your verification process to enhance sustainability reporting accuracy through streamlined data collection, performance tracking, and compliance efforts.
-  **Proactive Risk Management:** We take a tailored approach to verification and help you identify reporting gaps early and mitigate risks before regulatory scrutiny.

We deliver innovative energy and sustainability solutions to thousands of commercial, industrial, and non-profit organizations for strengthened environmental accountability and transparency across supply chains.

Industries We Serve

Real Estate

GRESB Real Estate Assessment compliance

Manufacturing

CDP reporting and supplier sustainability questionnaires

Government

Verification of public CDP reporting and climate pledges

Healthcare

New York State Insurance Fund (NYSIF) verification and MassHealth initiatives

Data Centers

Independent assurance of environmental impact reporting

Education

Sustainability Tracking and Rating System (STARS) reporting verification

Sustainability assurance is a valuable exercise—we keep learning more each year and improving our processes and accuracy as a result. We have appreciated Environ’s ISOS Group for their support and guidance along the way.

— Chantal Beaudoin - Partner, Head of ESG
Knight Frank Investment Management

An Independent Advisor You Can Trust

The ISOS Group team combines industry expertise, regulatory knowledge, and a commitment to sustainability. Because ISOS Group operates independently as a division, but is part of a larger energy management organization with energy procurement, decarbonization, renewable energy, and engineering services, our clients get an integrated approach. You enjoy customer service big consultants don’t have time to provide. We’re available all year long to guide you on your journey to sustainable energy transformation.
